Restriction to one of the following invention is required under 35 U.S.C. 121.

Group I: claims 1, 3, 4, 8, 10, 11, 54 and 55 drawn to methods for treating hypoxic tumor cells in a host.

Group II: claims 28-45 drawn to compounds of different scope than the Group I compound.

The several inventions above are independent and distinct, each from the other, as they have acquired a separate status in the art as a separate subject matter for inventive effect and require independent searches. It noted that a reference to one Group I invention would not be a reference to the Group II invention under 35 U.S.C. 103. Further, the search for the compounds per se is in a different class than the search for the methods. Therefore, restriction for examination purposes is proper.

Applicants are required to make a provisional election even though this requirement is traversed.
